

myo

Enjoy
your living spaces

Do you work in a company,
a restaurant or a collective
space.... and are you
regularly confronted with
poor acoustics that pollute
your working environment?

In our workshops, we
design and manufacture
a wide range of acoustic
solutions and booths to
make all professional
spaces (finally) pleasant to
live in!

Our strength:

Helping you implement
your project with products
designed to be technical,
decorative, easy to install
and environmentally
friendly.

Quickly identify the main features of myO products

ACOUSTIC CERTIFIED

Pictogram guaranteeing that the myO product is certified to absorb different sounds in reverberant spaces.

The need for sound absorption is generally encountered in 3 different contexts:

- 1 / the meeting room, to improve the clarity of a sound or the intelligibility of a voice;
- 2 / the restaurant, to improve communication;
- 3 / the office space, to promote concentration and privacy.

This is why their performance is measured in an independent accredited test laboratory.

[Our product sheets can be viewed on our website.](#)

CERTIFIED STRUCTURING

Pictogram guaranteeing you that the myO product brings to the user more comfort thanks to a **visual separation** with its close environment.

Other benefits: the delimitation and organization of space (definition of dedicated areas, traffic direction ...).

CERTIFIED FIRE RESISTANCE

Pictogram guaranteeing that the myO product has a **B-s2, d0 fire reaction classification report** in some of the finishes we offer.

This certification is mandatory in most of public spaces (Test reports and regulations are available on request). It can also be requested by security commissions.

CERTIFIED PRODUCT ADAPTATION

Pictogram guaranteeing that the myO product can, under certain conditions, **be adapted** in terms of size and / or finish.

Do not hesitate to consult your usual contact.

 Finished products, entirely designed and manufactured in our workshops.

Make an informed & sustainable choice by choosing MYO, a naturally responsible brand.

The components of our products are selected for their environmental qualities: PEFC / FSC panel, ECOLABEL EU fabric covering, absorbent foam and OEKO-TEX fabrics, etc.

The components of our products are mainly manufactured in Europe. They are then transformed and assembled in our workshops in France.

Consume better, is to buy less!

Acoustic comfort does not rhyme with accumulation, which is why a MYO partner supports you in making the right and the right choice for equipping your spaces.

The Lugn universe offers 90% removable covers so that you only change the essentials ... in the event of a renewal.

Most of our products are 100% recyclable.

This brochure is printed with vegetable inks on 100% recycled paper.

SOLUTIONS

kinô

From a Japanese inspiration, myO products from the Kinô range are both functional and elegant. Designed to provide comfort and well-being, this range draws its essence from the minimalist design of the country's culture in the rising sun: mineral colors, cut patterns evoking the sun, the Seigaiha wave or the Dragon triangle. Easy to set up, kinô acoustic products will give you all the serenity you need to furnish your office spaces.

PRODUCTS

kinô

Kinô suspension
Kinô totem
Kinô screen
Kinô zone divider
Kinô desk divider

KINÔ SUSPENSION

Combine light & acoustics

The Kinô suspension is an acoustic object designed to reduce reverberation in your spaces. Add a light and the suspension gives off a warm, ambient light.

CYLINDER
ht: 500 - Ø400 mm

TULIP
ht: 500 - Ø480 mm

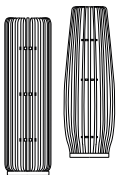

TRIANGLE
(depending on configuration)
ht: 530 to 560 - Ø600 mm

KINÔ TOTEM

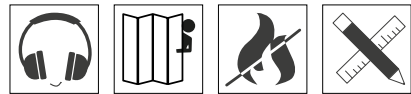

Composed of polyester fiber panels nested in a raw wood base, the harmonious curves of the Kinô totem are in the form of a cylinder or a tulip. Equipped with dimmable light, this acoustic totem has a very significant second function.

ht: 860 or 1560 mm
Basement : Ø400 mm

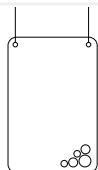

KINÔ ZONE DIVIDER

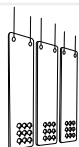

Elegance & lightness...

Give privacy to your spaces with Kinô zone dividers. Light and airy, these products are signed with a solid wood insert to highlight environmentally friendly manufacturing.

mono-zone divider:
1180 x 1800 mm

kit of 3 zone dividers:
3x (375 x 1180 mm)

KINÔ SCREEN

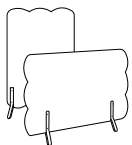

The Kinô screens, like the curtains, are available with or without cut-out patterns with wooden or PET bases. The Wavy version offers a slightly wavy panel cut-out.

Kinô screen - Rectangle

Kinô screen - Wavy

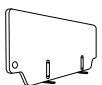

1000 x 1600 mm
 1000 x 1800 mm
 (24 mm thick)

1200 x 1600 mm
 1200 x 1800 mm

KINÔ DESK DIVIDER

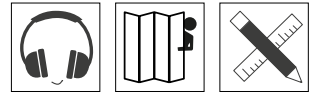

Privacy is
no longer a
privilege.

Thanks to different fixing systems, the Kinô desk divider can be placed or hung on an individual or double desk to allow everyone to have their space.

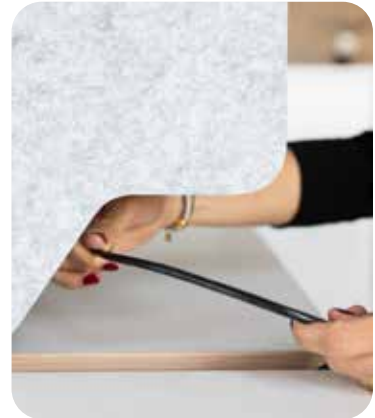

1100 x 470 / 580 x 24 mm
1300 x 470 / 580 x 24 mm
1500 x 470 / 580 x 24 mm

1700 x 470 / 580 x 24 mm
700 x 470 / 580 x 24 mm
800 x 470 / 580 x 24 mm

The cutout shape is designed to facilitate the arrangement of Kinô desk dividers and the passage of cables.

It is available in a flush version to the desktop or slightly overhanging version. It can also be simply installed.

SOLUTIONS

lugn

From Nordic inspiration, myO products in the Lugn range adopt Scandinavian style codes. To bring calm and serenity in noisy environments, these products are based on a robust design and the use of high performance acoustic material. The final touch: a wide choice of colors, multiple variations thanks to a fabric cover that most of the time can be easily removed !

1195x2390x50 mm

If silence was a decorative art ...

The Lugn rectangular acoustic panel is available in uni-color, printed or bi-color fabrics with a tone-on-tone stitching. It is magnetized on the wall or hangs horizontally, with or without integrated lighting ... to provide acoustic comfort.

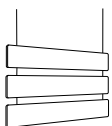

LUGN RECTO-VERSO PANEL

Vary the acoustics by playing on the shapes!

The Lugn recto-verso rectangular acoustic panel is fixed vertically, in portrait or landscape position. It provides double comfort: visual and acoustic.

1195x1195x50 mm
1195x1795x50 mm

LUGN CIRCLE

Lugn circle are acoustic panels. They can be hung, with or without integrated lighting.

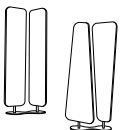

Ø 600 mm - Ø 800 mm - Ø 1200 mm
(45 mm thick)

LUGN ROTATING ACOUSTIC SCREENS-DUO 360

Set-up and make this new acoustic screen rotate at 45, 90 and up to 360°. The DUO 360 was designed to create more privacy (or not!) around a defined space or to delimit an aisle.

Rectangle : 375 x 1709 mm
Trapeze : 500/250 x 1709 mm
(±35 mm thick)

LUGN SCREEN - UNO

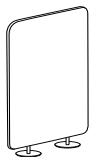

Bet on the
modularity
of spaces

This large screen ensures perfect stability thanks to its two 100 mm raised feet.

Complementing the Duo 360, the UNO screen structures spaces by providing privacy and acoustic comfort.

1200 x 1600 mm
(±35 mm thick)

LUGN CUBE & TOTEM

What you can hear is as important...

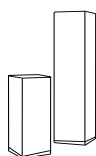

Placed and moved as you wish, the Lugn totem is easily movable. It will bring you acoustic comfort in spaces where walls and ceilings are sometimes very busy.

This fun Lugn cube can be suspended from the ceiling from a hook and provides both decoration and acoustic comfort.

310 x 310 x 310 mm
500 x 500 x 500 mm

1100 x 390 x 390 mm
2000 x 390 x 390 mm

LUGN DESK DIVIDER

... as what
you can see

Fixed or simply installed, the Lugn desk divider preserves everyone's privacy and provides more acoustic comfort.

400 x 1195 x 50 mm
495 x 600 x 50 mm
495 x 1500 x 50 mm

495 x 1700 x 50 mm
600 x 1195 x 50 mm

SOLUTIONS

quieto

From a Mediterranean inspiration, myO products from the Quieto range have a refined design, specific to their manufacturing method, thermoforming. Acoustic, they bring an original decorative touch to ceilings and walls. Their lightness combined with their diversity of implementation make Quieto products innovative solutions to meet the need for quietness in reverberant spaces.

760 x 1140mm
1140 x 1140mm

780 x 1570mm
1140 x 1570mm
(Thickness ±40 mm)

The QUIETO panels, without visible frame, bring a light and airy design to spaces while significantly reducing the reverberation of sound in the room.

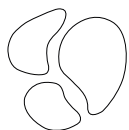

Available in suspended or wall-mounted versions, they can also be fitted with lighting.

QUIETO KIT

Creative acoustics

The Petals and Galaxies kits consist of 3 acoustic panels that can be hung or fixed to the wall using a magnetic system, with or without integrated lighting.

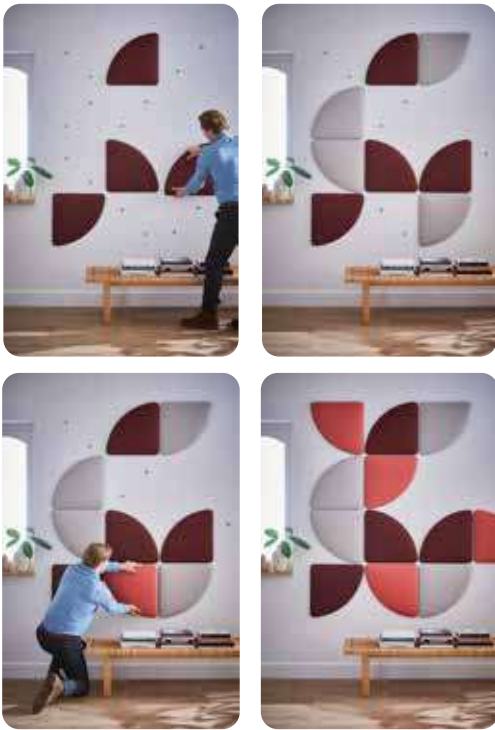

PETALS KIT

Average surface area: $\pm 1200 \times 1200 \text{mm}$
(Thickness $\pm 40 \text{mm}$)

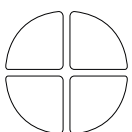

GALAXIES KIT

Average surface area: $\pm 1000 \times 1700 \text{mm}$
(Thickness $\pm 40 \text{mm}$)

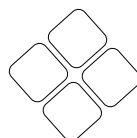

The Fans and Mosaics kits consist of 4 acoustic panels that can only be fixed to the wall using a magnetic system. The special thing about them is that you can create multiple compositions by playing with the way they are arranged.

They can also be offset from the wall and overlapped using the spacer system.

FANS KIT

Average surface area: $\pm 1000 \times 1000 \text{mm}$
(Thickness $\pm 40 \text{mm}$)

MOSAICS KIT

Average surface area: $\pm 1000 \times 1000 \text{mm}$
(Thickness $\pm 40 \text{mm}$)

QUIETO CEILING PANEL

Take design to the heights

QUIETO ceiling tile & ceiling panel can be fitted easily, by simply laying them as a replacement of conventional ceiling tiles on a T15 or T24 suspended ceiling frame.

(1) QUIETO CEILING TILE (±20 mm thick) | (2) QUIETO CEILING PANEL (±50 mm thick)

600 x 600 mm
600 x 1200 mm

QUIETOSTICK

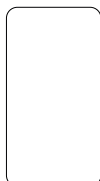

Choose the back of the cupboard back!

It can be customised with the visual of your choice or with a fabric finish. Lightweight, it can be fixed to any flat surface using Velcro® adhesive strips on glass, plaster, wood and magnets on metal. So you can enjoy better acoustics and a more pleasant view than the back of a cupboard!

QUIETO

760 x 760mm
560 x 1140mm
880 x 1140mm

1140x1140mm
780 x 157 mm
1140 x 1570mm

SOLUTIONS

aluscreen

Historical product of the myO brand, the movable low partition owes its name to its composition: an aluminum frame and a filling that act as a screen in spaces where flexible and easy partitions are required. Its particularity: its multiple choices of configurations ! Standard or acoustic, the movable low partition is a real chameleon that blends into your spaces.

SOLUTIONS

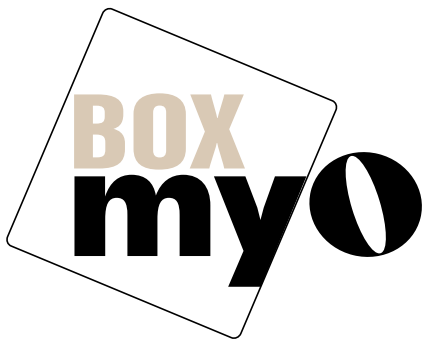

made to measure

Every project, every location is different... which is why we can tailor our products to your needs.

All you need to do is talk to us :)

Discover our range of
ACOUSTIC BOOTHS:
ready-to-install & ready-to-create.

Feel the need to isolate yourself ... alone or with others for a collaborative exchange, in a comfortable space, away from eavesdroppers. MyO products from the Box range certify confidentiality and offer you a new space for communication and / or temporary containment.

Spaces to be
together.

Acoustic solutions for workspaces

MYO designs and distributes soundproofing solutions for open business areas: booths, panels, suspension and column lighting, office partitions, art panels, etc.

Naturally eco-friendly

Our materials are selected for their environmental qualities: PEFC panels, EU ECOLABEL fabrics, OEKO-TEX acoustic foam...

Made in France

All the MYO products are manufactured in the North of France according to our short supply chain policy.
